Objectives and Investment Policy

- The Sub-Fund's objective is to achieve short-medium term capital growth while limiting fluctuations in the amount originally invested.
- The Sub-Fund invests in global fixed income securities (such as bonds issued by companies or governments) issued in the Euro currency.
- The fixed income securities invested in may be investment grade (by a generally recognised international rating agency) or if unrated, will be of similar quality.
- The Sub-Fund may use financial derivative instruments (FDIs) whose performance is linked to that of underlying security(s) or asset class(es). Their use may be for efficient portfolio management, hedging and/or direct investment purposes.
- The Sub-Fund is actively managed (meaning that the Manager has full discretion over the composition of the Sub-Fund's portfolio of assets) and is not managed with reference to any benchmark.
- The Manager has flexibility to change the Sub-Fund's asset allocation (% of the portfolio invested in bonds/FDIs etc) at any time and has discretion to select investments within each asset class.
- The Sub-Fund is appropriate for investors with a short-medium term investment horizon.
- The product is compatible with investors that can bear and/or afford to fully or partially lose the capital invested and are comfortable with no capital guarantee.
- Income and gains generated by the LB Class and SB Class of Units will be distributed periodically in the form of a dividend.
- All income and gains generated by the LA Class and SA Class of Units will be reinvested. No dividends will be paid.
- Units can be bought or sold on any business day from the Fund's Administrator.
- Please refer to the Prospectus and Sub-Fund Information Cards, in the sections titled 'Investment Objectives and Policies' for more detailed information.

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The risk category is based on historical data and may not be a reliable indication for the future.
- It is not guaranteed and may change over time.
- The lowest category does not mean 'risk free' investment.
- The Sub-Fund is classified in the risk category above due to the nature of its investments. The risk level is measured by the volatility of the Sub-Fund's past returns (or from the past returns of a suitable model portfolio if a full 5 year history is unavailable).

- The sub-fund invests in sufficiently liquid markets although, under stressed market conditions, it may only be able to sell assets at a discount.
- While bonds tend to be less volatile than equities, higher interest rates (which may be reflective of the underlying health of an economy) result in lower bond prices (and vice versa). Changes to credit risk and/or issuer defaults could also have a significant impact on the performance of fixed income securities.

A complete description of risks is set out in the Prospectus of the Fund in the section entitled 'Risk Factors'.

The following risks are considered material and may not be fully captured by the risk and reward indicator:
